APPENDIX 1 CLASSIFICATIONS

1. Key concepts and terms

- 1.1 **Fields of work** means a defined group of related skills and work functions exhibiting common features and aimed at providing more efficient and productive work organisation, as well as more satisfying and well paid jobs. In respect of this Agreement the field of work is Sprinkler Fitting. A stream shall be taken to include any work that is complementary, ancillary or enabling in its nature relative to the trade activity. The principal purpose of fields of work is to facilitate the development of training modules.
- 1.2 **CSQ** means Construction Skills Queensland. CSQ will be the recognised authority (for the purpose of this agreement) to endorse competency standards and skill sets required for the Sprinkler Fitter industry in Queensland.
- 1.3 **Module means** a module of training that equates to 40 nominal training hours.
- 1.4 **New entrant** means an employee, other than an apprentice, who has never previously worked within the scope of a building construction industry award or an agreement covering building construction industry work. If there is doubt as to the status of an employee in this regard, the following documentation may be regarded as prima facie evidence that an employee is not a new entrant:
- a) documentary evidence concerning registration with any of the portable industry long service leave schemes;
 - b) documentary evidence concerning contributions into an approved industry superannuation fund (e.g. CBUS, BUSSQ);
 - c) documentary evidence concerning membership of a union party to any of the above Agreements in the building and construction industry.

The new entrant classification does not apply to persons who were employed in the building and construction industry prior to the introduction of this agreement. Such employees are subject to the translation arrangements set out in this agreement.

The purpose of introducing the new entrant Level is not to displace existing employees, but to facilitate the introduction of a career path. Accordingly, an employer will not purposely turn over employees within the new entrant classification as an alternative to engaging employees on an ongoing basis.

Nothing contained in this clause will prevent a party from submitting a dispute about the status of an employee for determination under the dispute settlement procedure of this agreement.

- 1.5 **Services stream** includes all fields of work principally concerned with the installation, commissioning and maintenance of services, whether performed in relation to buildings, structures or engineering projects and irrespective of when that work is undertaken in the construction process.
- 1.6 **Services stream (Sprinkler Fittings)** means the skills and tasks at all appropriate levels in the classification structure which are included in the fields of work relevant to this Agreement.
- 1.7 **Skills package** means a bundle of skills or competencies within or across fields of work identified as related and complementary and approved as such by the CSQ.

A person who has a trade certificate or its equivalent which is relevant to the Sprinkler Fitting Industry will be deemed to have a trade certificate for the purpose of the definition of Sprinkler Fitting Tradesperson Level 1. Whether a trade certificate or its equivalent is relevant will be determined by the Union and the Employer organisation respondent to the Award.

The parties have agreed that the differential between a Sprinkler Fitter shall be 6.2% in favour of a Sprinkler Fitter over a carpenter, although this relativity is discounted by 1% to 5.2% by the introduction of a Services Trades Industry Levy pursuant to this agreement. This agreement will maintain this differential by providing for an annual increase to wages
- 2.4 In determining the appropriate classification/reclassification of a position or job to be filled by an employee, an employer will give full regard to:
 - a) whether the employee has proven competencies to the classification sought within an approved skills package.
